Wow! I'll try to get our report out next week. Then we can have a pow wow with all the key people to discuss follow on actions.

We will obviously need to install some more wells to determine pathway from the source to the city wells. With the really hi levels of PCE in soil at the Band Box, Vapor intrusion could be an issue at the neighboring residence across the street. We should also probably try to do some boreholes at the other two former dry cleaners to rule them out as potential sources.

Walt/Mark,

This material came to DEP via a referral from the Constituent Services folks in the Governor's Office. As you will see, the Governor's Office also checked in with Homeland Security concerning the issue.

It would appear that the citizen who called the Governor's Office is, at a minimum, due a return call from someone with technical knowledge of the situation. Since the concerns being expressed relate to health issues, might BPH be the appropriate source for returning the call and informing [Ex. 6 Personal Privacy (PP)]

what it being done? And/or should such a call be done in conjunction with a broader release of the information in the community?

Ed Maguire

**Subject:** Paden City Water Situation

Gentlemen,

Please see the attached e-mails regarding the a complaint from [Ex. 6 Personal Privacy (PP)] regarding the water situation in Paden City. I spoke with her today and she is very concerned that the Mayor of Paden City has been going on record saying PCE's have allegedly been in the water system for 10 years. The City Department is telling citizens to use water with caution but cannot tell citizens whether or not the water is safe. The local fire department has a sign up, "Do not drink the water." [Ex. 6 Personal Privacy (PP)] states Congressman McKinley's office reached out to the City asking if they need help and were told the City does not need help. [Ex. 6 Personal Privacy (PP)] spoke with McKinley's secretary, Chantel, and told her the citizens of Paden City are having to get water donations on their own. She was told by McKinley's office that the City just needs to ask for help if they cannot afford to provide an alternative water supply to the citizens. If the City cannot afford it, they can request help from Wetzel County, and, if the county can't help, the City can ask the for assistance at the state level.

[Ex. 6 Personal Privacy (PP)] was told by McKinley's office that the EPA and DEP are aware and looking into this situation. She would like someone from DEP to contact her and let her know what is being done with regard to this situation. In addition, I would appreciate if you would keep me in the communication loop so I can properly route any other complaints regarding this issue.

Thank you,

Kenna M. DeRaimo
